

Business Profile

Christoph Koch

After finishing his master diploma in electrical engineering Christoph Koch worked as software developer and as an object-oriented design coach. Being a captain in the Swiss army signals corps in 1998 he engaged with Omnisec AG. Cryptology and communication security started to become his passion. In over 14 years he held several leading positions (Head of SW Engineering, Head of Product Management, Head of Solution & Projects, Chief Operation Officer) at Omnisec and concluded several governmental secure communication projects worldwide.

In 2012 he finished the EMBA course at the University of Zürich and then joined Roschi Rohde & Schwarz AG in Bern eventually to become CEO. In the last 6 years, Christoph sold and delivered mainly secure communications and radio surveillance solutions to the Swiss army.

Most of his free time he dedicates to his 3 kids. He likes to be outside in his garden or on the mountain bike. Occasionally he flies his RC planes.

Since Summer 2018 he leads the CyberSecurity & Defence track within Cisco's CDA initiative in Switzerland.
